B) 44 autosomes and XYY sex

Molecular Biology of the Gene

As shown here for dT, each deoxyribonucleotide in the chain comprises a nitrogenous base, a phosphate group, and a phosphate group. The carbons of the sugar are numbered 1' to 5' as indicated.

The nitrogenous base is linked to the sugar by a glycosidic bond between a nitrogen and the 1' carbon of the deoxyribose sugar.

The 5' carbon of each sugar is linked to a phosphate group through an oxygen atom.
